PROFESSIONAL SUMMARY

Final-year Information Technology student with hands-on experience in Cloud Computing, AWS Services, Linux Administration, Git, GitHub, and Full-Stack Development. Currently working as a Cloud Engineering Intern at Edubot Software & Services, gaining practical exposure to AWS infrastructure, cloud networking, deployment workflows, and DevOps practices. Passionate about building scalable cloud solutions and continuously learning modern technologies.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, IAM, VPC, CloudWatch, SNS)
- **DevOps & Tools:** Git, GitHub, Linux, Nginx
- **Frontend:** React.js, HTML, CSS, Bootstrap
- **Backend & Database:** Node.js, Express.js, MongoDB

INTERNSHIP EXPERIENCE

Cloud Engineering Intern | Edubot Software & Services

Duration: 1 Year (Present)

- Worked with foundational AWS services including IAM, EC2, S3, VPC, CloudWatch, and SNS to support cloud infrastructure.
- Configured secure cloud environments by implementing granular IAM users, groups, and role-based policies.
- Performed Linux server administration, configurations, and command-line automation operations.
- Utilized Git and GitHub for structural version control, branch management, and collaborative development code reviews.
- Participated actively in cloud deployment workflows, cloud networking, and infrastructure management activities.
- Completed comprehensive hands-on assignments involving complex AWS architecture design and modern DevOps workflows.

PROJECTS

Edubot Leave Management System (React.js, Node.js, Express.js, MongoDB)

- Developed a robust leave management platform dedicated to streamlining employee leave tracking and multi-tier approval workflows.
- Implemented secure authentication, strict role-based access control (RBAC), and automated leave balance tracking management.
- Integrated frontend interfaces seamlessly with backend REST APIs ensuring an optimized, responsive user experience.

Vaultfy – Cloud File Storage Platform (React.js, Node.js, Express.js, MongoDB, AWS)

- Developed a secure, Google Drive-inspired cloud file storage and structural file-sharing web application.
- Implemented seamless file upload, cloud storage retrieval, and granular asset management functionalities.
- Designed a highly scalable backend architecture utilizing secure AWS file handling workflows and storage layers.

EDUCATION

B.Tech in Information Technology

Dhanekula Institute of Engineering & Technology

CGPA: 7.29
